ABOUT

A Software Developer with around 2 years of experience in building and managing web apps. I have solid understanding of JavaScript, ReactJS, HTML5, CSS3. Also, I'm passionate, self-motivated and always eager to learn something new.

EXPERIENCE

Frontend ReactJS Developer-IN-D

Now I am working as Frontend Developer for IN-D. I have 1.7 Year experience in ReactJS and almost 2 years in frontend technologies like HTML5, CSS3, JavaScript, Bootstrap.

Python Developer.

I worked in Python and Django web development. I developed Django backend authentication using JWT tokens for my In-d.

Python Developer-SeaPortAI

July 1-10

Python development which is related to object detection and TensorFlow.

PROJECTS

KYC

KYC is a process of connecting users and bank agents for completing their e-KYC or vKYC. users can be opening their bank accounts or personal accounts using ekyc or vKYC process without reaching the nearest banks or KYC centers.

Invoices

Data extraction from invoices and other types of documents. This product is based on ReactJS and other front-end technologies.

Movie-Poster

Movie-poster is a full-stack web application based on Python-Django development. This app is inspired from the IMDB API, in this app there are a lot of features like trending films, search, list of movies, trailer, cast and crew details etc...
